ANTI-GLARE

Zipscreen is the ultimate external screening solution for any outdoor area or window

Specially designed for alfresco entertaining areas such as pergolas, verandas, and balconies, it offers **privacy and protection** from the sun, wind, rain, and insects **all year round**.

Also ideal for home and office windows, it serves as a sleek, secure, and durable alternative to traditional awnings & outdoor roller shutters. Your custom designed system can be made in widths up to 5 metres or an impressive 7 metres with Zipscreen Extreme, offering you an external solution to fit almost any area.

KEEP YOUR HOME COOL IN SUMMER AND WARM IN WINTER

Direct sun on your windows is the greatest source of unwanted heat in the home. Effective external shading can solve this problem by blocking up to 90% of that heat. By shading a building and creating an effective barrier between the sun and your window, you can create a cooler home environment and save energy.

Shading glass is the best way to reduce unwanted heat gain, however, permanent shading structures that are inappropriately placed and designed can block winter sun, while extensive shading in summer can reduce pleasant daylight. Adjustable shading systems can offer the best of both worlds, reducing heat build-up in summer, and enabling warm winter heat when the system is retracted.

HIDDEN z-LOCK™ TECHNOLOGY

Breakthrough z-LOCK™ technology provides a unique fabric guide, fastening and securing the welded zip and fabric concealed within the side channels; creating a strong, smooth and streamlined system. The hidden z-LOCK™ function ensures no gap between the fabric screen and side channels and a secure guided movement that won't blow out in the wind. A total seal provided by Zipscreen's z-LOCK™ technology and bottom sealing strip aids in creating a relaxing insect free environment.

INNOVATIVE ALUMINIUM HEADBOX

High-quality square aluminium profile boasts a contemporary aesthetic, offering fully or semi-enclosed headbox and full or semi-fascia configurations.

ONE ACTION ULTRA-LOCK & TENSION

The patented technology of Ultra-Lock enables the shade to be closed, locked and tensioned in one easy action, for a secure and taut fabric finish.

SPECIFICATIONS

CONTROLS

There are a range of options for Zipscreen controls, motorised or manual with a simple crank gear or spring.

SMART HOME

No matter where you are, you can accurately control your shades via the animated interface on your smartphone.
